Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. INTRODUCTION

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Some of the figures included in this *Digest* are provisional and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the *Supplement to the Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- * average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Table numbering. Tables were re-numbered within sections from the January 1977 issue. A reconciliation of the new table numbering with the old was shown in the January, February and March 1977 issues.

Supplementary tables

Supplementary tables published recently in the *Digest* are listed below, together with the date of issue in which they appeared:

Projected Total population of the United Kingdom. August 1979

Changes in content

This issue contains supplementary tables of the Index of Industrial Production, 1973-78 (Tables A to C, pages 180 to 203).

Table 6.17—*Nutritional value of household food.* This table now gives data for Households with 2 or more adults and 3 or more children instead of Households with 4 or more children.

Table 12.4—*Building materials and components.* Information for Pitch fibre pipes and conduits has been discontinued.

Table 13.2—*Road Vehicles in Great Britain licenses current.* The index section of this table has been discontinued.

Table 13.3—*Index numbers of road traffic and goods transport by road.* Data for mopeds, motor scooters and other motor cycles had been amalgamated under Motor cycles, etc.

Table 18.14—*Index of purchase prices of the means of agricultural productions* and Table 18.15—*Index of producer prices of agricultural products.* These two tables have been rebased on to 1975=100.

Recent Data

Because of industrial action recent data for certain series are not yet available.

⁽¹⁾Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 1.3.

⁽²⁾These figures are revised and brought up to date in the January, April, June and October issues. In the March, June, September and December issues Table 1.5, 1.6 and 1.7 may show more up to date figures for individual series than those shown here. ⁽³⁾Including extra capital formation in imported oil platforms and related equipment delivered during the summer but not adjusted for seasonality approximately £150 million in second quarter 1976, £125 million in third quarter 1976 and £225 million in second quarter 1977.

⁽⁴⁾This represents taxes on expenditure less subsidies valued at constant rates.

(1) Estimates of the gross domestic product obtained from statistics of expenditure are given in Table 1.1.

(2) The figures are adjusted to allow for the use of delivery rather than production indicators to represent output in certain industries within manufacturing. A detailed analysis of industrial production is given in Table 7.1, but will differ from the series shown here because the adjustment included is not available monthly or for individual industries. There may also be differences because Table 7.1 includes the latest information.

(3) Total output other than exploration for, and extraction of, petroleum and natural gas (MLH 104) is as follows:

1977 1st quarter	103.2	1978 1st quarter	103.9	1979 1st quarter	105.0
2nd quarter	102.7	2nd quarter	105.7	2nd quarter	107.8
3rd quarter	103.3	3rd quarter	106.4		
4th quarter	103.5	4th quarter	106.0		

(4) This series may not be fully consistent with that shown in Table 7.1 which includes the latest information.

Note: From 1971 the employees in employment estimates are based on an annual census of employment. For the years before 1971, estimates are taken from the continuous series published for Great Britain in the March 1975 issue and for the United Kingdom in the October 1975 issue of the *Department of Employment Gazette*.

⁽¹⁾The figures for employees in employment in the United Kingdom include recent small revisions to the Northern Ireland figures. ⁽²⁾From June 1974 the figures for self-employed persons in Northern Ireland are assumed unchanged.

⁽³⁾From December 1977 the figures for employees in employment in the United Kingdom include a constant component for Northern Ireland. ⁽⁴⁾Estimates for Great Britain after June 1976 are provisional. ⁽⁵⁾Employment estimates are provisional after June 1976.

See Note to Table 3.1

Note: Because the figures have been rounded independently totals may differ from the sum of the components, also the totals include some employees (some 3,300 in 1975 and 8,700 in 1976) whose industrial classification could not be ascertained.

⁽¹⁾Provisional.

⁽²⁾Excluding private domestic service.

⁽³⁾The industries included in the index of production are Orders II-XXI of the Standard Industrial Classification 1968.

⁽⁴⁾The estimates for agriculture are taken from the censuses of agriculture and exclude a small number of employees of agricultural machinery contractors.

⁽⁵⁾Excluding members of HM Forces.

⁽¹⁾The seasonally adjusted series has been calculated as described in the *Department of Employment Gazette*, May 1979.

⁽²⁾Percentage rates have been calculated by expressing the total numbers unemployed as percentages of the numbers of employees (employed and unemployed) at the appropriate mid-year. The latest base available is the provisional estimate for mid-1978.

⁽³⁾Except for Northern Ireland, the figures for 1974 and the totals for 1976 are the averages of eleven months. The male and female averages for 1976 are for ten months.

⁽²⁾The denominator used in calculating the percentage rate of unemployment is the appropriate mid-year estimate of total employees (employed and unemployed) at the appropriate mid-year. The latest base available is the provisional estimate for mid-1978.

⁽³⁾The seasonally adjusted series have been calculated as described in the *Department of Employment Gazette*, May 1979.

⁽¹⁾This group includes those who, at the operative date, had been unemployed for only a short time and whose claims were still being examined. Also included are those who are registered for employment but not claiming benefits (e.g. those married women who are not entitled to benefit, some school leavers, some retired people who are again seeking employment, and some people who have been disqualified from receiving unemployment benefit or who have received all the unemployment benefit to which they are entitled in their current spell of unemployment).

⁽¹⁾The figures represent only the number of vacancies notified to unemployment offices and careers offices by employers and remaining unfilled on the day of the count. It is estimated from a survey carried out in April-June 1977 that vacancies notified to employment offices are about one-third of all vacancies in the country as a whole.

⁽²⁾Vacancies notified to employment offices could include some that are suitable for young persons. Similarly vacancies notified to careers officers could include some for adults. Because of possible duplication the two series should not be added together.

⁽¹⁾Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. There may be some under-recording of small or short stoppages; this would have much more effect on the total stoppages than on working days lost. The figures for 1979 are provisional.

⁽²⁾The analysis by industries is based on the Standard Industrial Classification 1968.

⁽³⁾Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

⁽⁴⁾The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Includes overseas cases.

(2) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

(3) Including non-contributory invalidity pension introduced from 20 November 1975.

(4) Including prescribed industrial diseases.

(5) Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(6) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.

(7) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.

(8) Including a diminishing number of widows with pensions of £1.50 a week derived from the old Contributory Pensions Acts.

(9) Family allowance up to 31 March 1977: Child benefit from 1 April 1977.

(10) Figures for years earlier than 1977 include the elder or eldest child for whom an allowance was not payable but excludes single child families.

(11) Estimate.

⁽¹⁾Pension age means 65 years for men and 60 years for women.

⁽²⁾Includes a small number of persons over pension age.

⁽³⁾Estimated.

⁽⁴⁾Prior to November 1977, the figures were obtained by counting 'live' documents in supplementary benefit offices. From this date the figures are estimates derived from a sample of cases receiving a payment for the week of the enquiry and exclude some cases previously included in the count.

⁽³⁾ Statistics of home-production and consumption of beer from January 1976 take account of brewing at high gravity with the addition of some brewing liquor after fermentation.

Source: HM Customs and Excise

⁽⁴⁾ From 1 July 1977 information on the country of origin of wine of fresh grapes is available from HM Customs and Excise by subscription only.

⁽⁵⁾ 15 per cent alcohol by volume represents approximately the previous dividing line between heavy and light wines.

⁽⁶⁾ The duty on cider and perry was introduced on 6 September 1976.

(1) *Department of Health and Social Security. Recommended daily amounts of food energy and nutrients for groups of people in the United Kingdom.* HMSO, 1979. Figures in brackets are based on the recommendations made in 1969 and used up to 1978 in the National Food Survey.

(2) All values make allowance for wastage in the home of ten per cent of the edible portion of food acquired and for expected losses of nutrients during cooking. The percentages do not take into account the contributions made by sweets, soft drinks, alcohol and some outside snacks to dietary intake, but they include some allowance for meals out.

(3) Estimates are no longer given for vitamin D because the amounts which are necessary for health can be completely derived from normal exposure to sunlight and the Department of Health no longer make recommendations for dietary intakes of this nutrient.

⁽¹⁾For an index of construction output for Great Britain, see Table 12.1.

⁽²⁾The index for production of all industries other than mineral oil, natural gas and natural gas condensates classified to MLH 104 of Order II Mining and Quarrying.

⁽³⁾Industries are grouped according to the Standard Industrial Classification 1968.

⁽¹⁾For a description of this series, see the article on page 360 of the April 1971 issue of *Department of Employment Gazette*.

⁽²⁾Quarterly estimates are derived as averages of the monthly figures.

⁽³⁾In the absence of earnings data for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit output has been calculated for that month. The indices calculated for January and March 1972 are less reliable than usual.

(1) Consumption by fuel producers plus colliery disposals to final users plus (for annual figures only) net foreign trade and stock change in other solid fuels. See also footnotes (4) and (5) to Table 8.5.

(2) Refinery throughput of crude oil plus net foreign trade and stock change in petroleum products less deliveries of non-energy products.

(3) Excluding gas flared or re-injected.

(4) Also temperature corrected. (Natural gas from 1973).

* Five week period.

(1) Including coke. (2) Including quantities used in the production of steam for sale. (3) Including oil used in gas turbine and diesel plant and for lighting on coal-fired boilers. (4) Including generation by gas turbine, diesel and hydro-electric plant. (5) Used on works and for pumping at pumped storage stations. (6) Including net imports and purchases from outside sources mainly UKAEA and British Nuclear Fuels Ltd. The England and Wales figures include net exchanges with Scotland. *Average of five weeks.

⁽¹⁾The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland. ⁽²⁾Crude oil plus condensates and petroleum gases derived at onshore treatment plants. ⁽³⁾Includes process (partly refined) oils. ⁽⁴⁾Includes condensate for distillation. ⁽⁵⁾Mainly recycled products. ⁽⁶⁾Foreign trade as recorded by the Petroleum Industry and may differ from figures published in *Overseas Trade Statistics*. ⁽⁷⁾Re-exports of imported crude which may include some indigenous oil in blend. ⁽⁸⁾International marine bunkers. ⁽⁹⁾Statistical difference due to slight variation in recording dates of shipments.

⁽¹⁾ Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes in the *Supplement*.

⁽²⁾ Figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/1 (polishes).

⁽³⁾ A short standard is 7,200 matches. ⁽⁴⁾ Provisional.

(1) Including manganese ore. (2) From January 1974 the totals are for usable steel in accordance with the system used by EEC and the International Iron and Steel Institute. (3) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1973 the figures are revised due to re-measurement. Figures include stock of semi-finished steel for the manufacture of heavy products. (4) 53 week period. (5) From January 1974, imports have been amended to include Hot rolled coils for direct use previously regarded as for conversion. (6) Provisional. *Average of five weeks.

⁽⁷⁾In 1977 some firms were reclassified from the Construction industry (MLH 500) to the Constructional steelwork industry (MLH 341.4). To allow for increased coverage in 1977 and elimination of misreporting in previous years, sales of Constructional steelwork in 1976 should be increased by 14 per cent and data for 1972-1975 by 19 per cent, to obtain a more consistent time series for 1972-77.

⁽⁸⁾From the 1st quarter of 1977 figures cover establishments with 50 or more employees. Earlier figures relate to establishments with 25 or more employees.

⁽¹⁾Includes naval vessels registered as merchant ships.

⁽²⁾Gross tonnage (100 cubic feet per g. t.) is the total volume of all the enclosed spaces of a vessel.

⁽³⁾The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on completion.

⁽⁴⁾Vessels are shown for export if they are for other than UK registration.

⁽⁵⁾Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

⁽⁶⁾Modifications and cancellations exceed new orders for the period.

⁽¹⁾Excluding building which is wholly financed from private sources. ⁽²⁾From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. ⁽³⁾Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. ⁽⁴⁾From April 1977 the cost of teacher training projects for England and Wales has been included under Further education. ⁽⁵⁾Figures for England and Wales include the value of projects for which specific approval is not required. ⁽⁶⁾Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain main projects for which specific approval is not required. ⁽⁷⁾The Under construction and Completions figures exclude the value of approved school projects which in 1972 amounted to £1,246,000 and £406,000 respectively. ⁽⁸⁾This figure has been adjusted to show the total of projects listed in the local authority returns for 1st Quarter 1979 as still under construction.

⁽¹⁾The four-weekly averages for each year are computed from calendar year totals.

⁽²⁾Freight train traffic only.

⁽³⁾From January 1969 until December 1973 figures have not included estimates for freight carried on behalf of National Carriers Ltd. and Freightliners Ltd.

⁽⁴⁾As from January 1974 estimated results for National Freight Corporation traffic tonnages have been incorporated by British Railways, and hence in the above tables also. Comparable annual average figures for 1974 with those previously would be, respectively 13.01 and 3.85.

⁽⁵⁾Estimates for National Carriers Ltd. and Freightliners Ltd. are excluded from net tonne kilometre figures.

⁽⁶⁾From January 1979, net tonne kilometres have been estimated on a different basis from that previously used.

⁽¹⁾ The ratios were first introduced in the August 1977 edition of *Economic Trends* in an article 'The Home and Export Performance of United Kingdom Industries' which described the conceptual and methodological problems involved in measuring such variables as 'import penetration'. The industries are grouped according to the Standard Industrial Classification 1968. The latest ratios for the full detail within manufacturing (over one hundred MLHs) are shown in *Business Monitor* MQ12. The trade figures used as the numerators for the ratios are the Overseas Trade Statistics reclassified to the Standard Industrial Classification which are published in *Business Monitor* MQ10.

⁽²⁾ Certain sectors are excluded since they are inappropriate for this analysis. They are the following MLHs: 239 Other drink industries, 240 Tobacco, 342 Ordnance and small arms, 396 Jewellery and precious metals, 423 Textile finishing, 433 Fur, and 474 Shop and office fittings.

The monthly figures which may incorporate subsequent revisions, are as published by the Department of Trade. Because the estimates for recent periods are less accurate than usual (see footnote⁽²⁾ Table 16.1), they have been rounded to the nearest £100 million, and may not add across exactly.

⁽²⁾These figures are projections and are subject to revision as the relevant statistical information becomes available.

(1) Valued in sterling at market related rates of exchange. Therefore, the sterling valuations of the flow does not equal the change in the levels shown in Table 16.4. (2) Includes capital transfers of £-75 million in 1974. (3) Balance of current and capital transactions covered by official financing other than that relating to the allocation of SDR's. (4) Includes borrowing by public bodies under the exchange cover scheme, drawings by HM Government on two Euro-dollar facilities and a \$350 million bond issue in New York.

(1) Until end-March 1979 convertible currencies are valued in dollars at middle or central rates. Special drawing rights are valued at SDR1 = \$1.08571 for end-1972 and at SDR1 = \$1.20635 from end-1973 to end-March 1979. Gold is valued at \$38 per fine ounce for end-1972 and at \$42.2222 per fine ounce from end-1973 to end-March 1979. (2) From end-March 1979 the rates at which the reserves are valued in dollars are revised annually. Convertible currencies and SDR's are valued at the average of the middle market closing rates in the three months to end-March, and gold at the average of the London fixing prices for the three months up to end-March less a 25% discount. (3) Data denominated or expressed in dollars are converted to sterling at end-period middle-market rates. (4) Drawings from the IMF, excluding interest and charges and net of repayments to and drawings from the IMF by other countries in sterling. (5) In July 1972 the official reserves were redefined to include the UK reserve position in the IMF, which at the time amounted to \$760 million.

⁽¹⁾Payment to National Loans Fund representing its payments for the service of the National Debt, less receipts of interest outstanding. ⁽²⁾Includes payments out of the Consolidated Fund for the service of the National Debt under Section 15(1) of the National Loans Act 1968, and transfers of surpluses of the Death Duties Surrendered Securities Account in March each year. ⁽³⁾See Table 17.2 for details. ⁽⁴⁾For recent periods the monthly figures may not aggregate precisely to the quarterly figures because the former include minor revisions which, for consistency reasons cannot yet be reflected in the quarterly figures. ⁽⁵⁾Excluding borrowing from the National Loans Fund. ⁽⁶⁾This is equal to National Loans Fund borrowing and special transactions (net) less receipts from other central government funds, etc.

⁽¹⁾In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. ⁽²⁾Including loans used for redemption of government stock. ⁽³⁾Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. ⁽⁴⁾Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer. ⁽⁵⁾From January 1975 loans to Royal Ordnance Factories and to Royal Mint, previously in Loans to other public corporations: Other, are classified to Lending within central government, from April 1978 loans to Royal Ordnance Factories, Royal Mint and Property Services Agency Supplies Division are classified to Loans to other public corporations: Other.

(1) Minimum 12.5 per cent. (2) Virtually all interest bearing. (3) Minimum 10 per cent. (4) Banks in Northern Ireland are currently exempt. (5) For further details see *Supplement of Definitions and Explanatory Notes 1979*, p. 38. (6) The adjustments to special and supplementary deposits arising from the mid-November figures were made after the mid-December reporting date.

(7) Figures for Northern Ireland banks are not available because of industrial action by bank employees. Total figures for all banks include those for Northern Ireland bank for mid-May 1976. (8) In August 1978 part of the special deposits paid by the London and Scottish clearing banks was released, for the duration of the supplementary special deposits scheme, in connection with these banks' agreement in 1976 to provide additional finance under the then existing fixed-rate export and shipbuilding schemes. (9) The addition of National Girobank to this series in October 1978 inflated eligible liabilities by £310 million and reserve assets by £85 million; the reserve ratio of British banks; other and of all banks were raised by 0.7 per cent and 1 per cent respectively. Hitherto this bank was outside the normal credit control arrangements.

⁽¹⁾Derived from yield maturity curves fitted mathematically. Figures revised from January 1973 and a further modification in the method of calculation was introduced in June 1976: an explanation of the changes appeared in the *Bank of England Quarterly Bulletin* December 1972, September 1973 and June 1976. The yearly figures are averages of monthly yields. The monthly figures relate to averages of Wednesdays. ⁽²⁾Average of working days based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored. ⁽³⁾Averages of daily figures calculated from middle market closing prices. ⁽⁴⁾Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

⁽¹⁾From 13 October 1972 to 24 May 1978 the Bank of England's minimum lending rate to the market was normally set one half per cent higher than the average rate of discount for Treasury bills established at the most recent tender, rounded to the nearest one quarter per cent above. With effect from 25 May 1978 the rate has been determined by administrative decision with changes normally being announced at 12.30 p.m. on Thursdays; a new rate becomes effective, for lending by the Bank, immediately.

Note: New monthly series of indices of average earnings of employees in Great Britain have been introduced based on average earnings in January 1976=100, as described in an explanatory article in the April 1976 issue of the *Department of Employment Gazette*. The latest available values of the principal new index, covering virtually the whole economy, are given in the table, together with corresponding indices for the various industry groups (Order groups of the Standard Industrial Classification).

Types A, B and C, see Note on page 160.

(1) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for the whole economy.

(2) England and Wales only and excluding fishing.

(3) Except sea transport.

(4) Some small industries are not covered.

(5) Excludes private domestic and personal services.

(6) Provisional.

Note: There are three sets of industry groups:

Type A: those for which the indices previously published in Table 18.4 have been rebased on January 1976, by scaling;

Type B: those for which indices were not available before 1976;

Type C: those for which indices were available before 1976 but with narrower coverage than those now available.

⁽¹⁾The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly.

A brief note on the method of compilation of the figures is given in the current issue of the *Department of Employment Gazette*.

⁽²⁾For details of hourly wage rates see the *Department of Employment Gazette*. ⁽³⁾The industry groups are analysed according to the Standard Industrial Classification 1968. ⁽⁴⁾Metal manufacture; mechanical, instrument and electrical engineering; shipbuilding and marine engineering; vehicles and metal goods not elsewhere specified. ⁽⁵⁾As explained in articles in the May 1977 and May 1978 issues of the *Department of Employment Gazette*, movements in these indices have been influenced considerably by nationally negotiated rates for engineering workers remaining unchanged between February 1976 and April 1978.

⁽²⁾The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards. ⁽³⁾The monthly totals in the columns headed Increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals. ⁽⁴⁾The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work (excluding overtime) at basic rates of wages or minimum entitlements at the end of any one year, exceeds that for the corresponding week of the preceding year by the amount stated. The average basic weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(1) The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

^{(1),(3)} see page 166.

⁽⁴⁾ A base weighted (1975=100) combination of the separate price indices for contractors' output in the five new work sectors.

⁽⁵⁾ The index covers only dwellings on which building societies have approved mortgages during the period. The cost of land is included.

⁽⁶⁾ From 1975 figures are based on a new monthly return covering 90 per cent of building society mortgages.

⁽¹⁾Sound licences abolished 1 February 1971. ⁽²⁾Great Britain. ⁽³⁾From January 1975 (now five-week period) trading periods re-aligned; results of 1977 Cinema inquiry incorporated from January 1977. ⁽⁴⁾From April 1973 includes VAT.

⁽⁵⁾These figures include two weeks additional license input this month and do not reflect the true position. This is due to industrial action which has effected the timing of the figures.

CENTRAL STATISTICAL OFFICE

Economic Trends

This monthly journal brings together all the main economic indicators. The data are mainly given in time series and graphs covering five years or so.

There are also articles commenting on and analysing economic statistics and —when appropriate — introducing new series and new methodology. *Economic Trends* is the primary publication for the quarterly national accounts and balance of payments articles.

Using Statistics in Economics

A Teaching Pack

Designed specially for higher level business and A-level economics students, **Using Statistics in Economics** provides practical experience of using statistics.

Using Statistics in Economics is built round a study of the UK motor vehicles industry. It is in seven sections. Each deals with a different aspect of the industry. Teachers' notes are provided for each section, giving notes for answers and suggestions for additional questions and further reading.

The pack was prepared by the CSO in co-operation with the Library Association/Royal Statistical Society Committee of Librarians and Statisticians.

Using Statistics in Economics — a study of the UK motor vehicles industry costs £2.19 including postage.

Available from Press and Information Service (TP), Central Statistical Office, Great George Street, London SW1P 3AQ.

CENTRAL STATISTICAL OFFICE

Blue Book 1979

Pink Book 1979

This publication, **United Kingdom Balance of Payments 1979 Edition**, prepared by the Central Statistical Office, is designed as a standard reference for balance of payments statistics over a long run of years up to 1978. In addition to summary tables showing the general balance of payments for the United Kingdom, it contains 14 sections of tables each with comprehensive notes and definitions. Some of these expand the detail for individual sectors of the accounts; others deal with associated areas such as the financing of private investment and its overall effects, the City's overseas earnings, etc.
